e-mail: info@physio-europe.org

Qualification: Φυσιοθεραπευτσ&f;(Physiotherapist) The title and the professional activity is protected by the state. The rules of professional conduct are determined directly by the state through national legislation. The physiotherapist must be state registrated and obtain a licence to practice. Cyprus has a code of ethics for physiotherapists. The national authority responsible for the physiotherapy profession in Cyprus is the Ministry of Health. There are sufficient employment opportunities for physiotherapists in the country.

Practice of physiotherapy:

The physiotherapy services in Cyprus now are determined by the profession. The physiotherapist is now allowed to determine the clinical intervention of physiotherapy him/herself since the 2005 amendment of the legislation. Cyprus offers both private and public physiotherapy services. The insurance cover for physiotherapy is paid through the national health care system in some cases and/or privately by the patient either in the public or private sector.

Twinning:

The Cyprus Association has not yet established any twinning program but the association hereby announces its wishes to do so.
